Languages

French
Native

English
Bilingual

Technical Skills

End-to-end management of Data Science projects
Business requirements analysis and scoping
Data ingestion and integration, ETL/ELT pipelines
Large-scale data processing and analysis
Predictive modeling
Regression, classification, clustering, feature selection
Generative AI

Technologies

Python
Spark
SQL
Databricks
MLFlow
Azure
Confluence
Git

Soft Skills

Creativity, Versatility, Intellectual curiosity, Clear communication, Teamwork, Leadership.

Manel YALA
Data Scientist

Data Scientist with +3 years of experience and a strong academic background in artificial intelligence. I combine scientific rigor with practical execution and am driven by curiosity and impact. I focus on turning data into actionable decisions and strategies. My approach is grounded in a deep understanding of business needs and value extraction from data

Work experience

- Data Scientist**
Groupeement Les Mousquetaires, Châtillon From April 2025 to October 2025
Project: Cash Flow Forecasting Using Deep Learning
Exploratory data analysis; design of ETL pipelines for data processing and model training with experiment tracking.
Results: 30% reduction in prediction error margin and optimization of €200M in cash flow over a 6-month period.
- AI Research Assistant**
LATMOS Sorbonne Université, Guyancourt From April 2024 to March 2025
Project: Precipitation forecasting from satellite imagery using convolutional neural networks.
Design of ETL and training pipelines; model validation and analysis of attention regions.
Results: Forecasts consistent with Météo-France predictions.
- Data Engineer**
Natixis Corporate & Investment Banking, Algiers From August 2023 to April 2024
Translation of business challenges into data-driven indicators and exploratory statistical analyses.
Design and production deployment of data pipelines and automation of data flows.
Development of AI models (profiling, anomaly detection).
- Data Scientist**
Djezzy Télécom, Algiers From January 2022 to July 2022
Project: Fraud Detection Using Big Data and Supervised Learning
Development of an interactive dashboard for model selection, money laundering analysis, and fraud localization.
Results: +20% increase in detected fraudsters and 38% reduction in false positives.
- BI Analyst and Full stack dev**
Pitch Events, Algiers From July 2022 to July 2023
Development of an event management solution and analysis of customer data collected through the platform.

Education

- Research Master's Degree in Information Processing and Data Science**
Télécom Sudparis, Paris From 2024 to 2025
Ranked among the [Top 10 AI master's programs in France](#). Degree awarded with honors.
- Master's Degree in Intelligent Computer Systems**
USTHB, Algiers From 2022 to 2024

Awards and voluntary experience

- Winner of the "Best Young Enterprise" Award**
Young Entrepreneur League, Doha, DA, Qatar 2024
- Head of Operations and Logistics Department**
Micro Club, Algiers From 2019 to 2024
